## Beach Advisory for Oct. 26, 2012

### FOR IMMEDIATE RELEASE

Contact: Environmental Monitoring and Analytical Services Division  
(671) 475-1656, (671) 475-1658/9 Email: [Bob.Salas@epa.guam.gov](mailto:Bob.Salas@epa.guam.gov)  
Website: [epa.guam.gov](http://epa.guam.gov), [Facebook.com/GuamEPA](https://www.facebook.com/GuamEPA), [Twitter.com/GuamEPA](https://twitter.com/GuamEPA)

### Beach Closures: 1

ATTENTION: West Hagåtña Bay is currently closed due to the intended or continued use of the old fractured outfall at the Hagåtña Sewage Treatment Plant as emergency and/or bypass overflow. The area closed includes Hagåtña Boat Basin & Channel and the West Hagåtña Beach Park.

### Beach Advisories: 22

The results of samples taken by the Guam Environmental Protection Agency on Thursday, October 25, 2012, identified that the following recreational waters were polluted above the accepted bacteriological standards:

- TAMUNING: Gongga Beach, Ypao Beach, Dungca's Beach
- HAGATNA: West Hagatna Bay (West Storm Drain)
- ASAN: Adelup Beach Park, Adelup Point Beach (West), Asan Bay Beach
- PITI: Piti Bay, Santos Memorial Park
- AGAT: Togcha Beach - near Namu River, Togcha Beach - Agat Park Beach, Togcha Beach (Near Southern Christian Academy), Bangi Beach, Nimitz Beach
- UMATAC: Umatac Bay, Toguan Bay
- MERIZO: Merizo Pier at Mamaon Channel
- INARAJAN: Inarajan Pool, Inarajan Bay
- TALOFOFO: Talofofu Bay, Togcha Bay
- CHALAN PAGO-ORDOT: Pago Bay

Swimming, fishing or playing in unsafe waters may result in minor illnesses such as sore throats or diarrhea. It may also result in more serious illnesses such as meningitis, encephalitis, or severe gastroenteritis. Children, the elderly and people with weakened immune systems have a greater chance of getting sick when they come in contact with contaminated water.

The Recreational Waters Pollution Report is compiled by Guam EPA's Environmental Monitoring and Analytical Services (EMAS) Division. Guam EPA has performed this community service weekly since 1974. The EMAS Division takes water samples of 42 recreational beaches every Thursday\* and analyzes the samples for concentrations of the enterococcus bacteria indicator. Advisories are based on an instantaneous standard of not greater than 104 enterococci/100 ml and a geometric mean standard of not greater than 35 enterococci/100 ml. \*Adjustments are made during official holidays.

*Kill date of this release is one week after publication. For the most current advisory visit [epa.guam.gov](http://epa.guam.gov).*
